

Applicants to study at the UdL increase by about 10%

Medicine remains the highest cut-off mark and ADE-Computer enters the 'top 5'

Applications in the first preference to study at the University of Lleida (UdL) increased by 9.85% compared to last year, from 3.611 to 3.967, according to data published today by the Department of Research and Universities. In this first assignment, UdL's own centers have covered 74.75% of the first places they offer in the degrees for the 2024-2025 academic year, while the average taking into account the affiliated centers is 68.52%.

The highest cut-off mark continues to be Medicine, with a 12,558; followed by the double degree of Nursing and Physiotherapy, with a 11,797, and Biomedical Sciences, with a 11,767. The double degrees in Business Administration and Management (ADE) / Computer Engineering, with 11.263; and Animal / Veterinary Science and Production, where the lowest grade of those assigned to the first is 11.252.

The UdL offers 2,722 first places for the next academic year, 260 more than the previous one. Most of the new offer is concentrated in the affiliated centers, although first-class places have also increased in Hispanic Philology and Art History. Total applications have gone from 20,468 to 22,010 and total allocations from 3,166 to 3,322.

The Vice-Principal for Academic Planning and Quality, Paquita Santiveri, values this pre-registration data very positively, "especially the increase in applications in first preference, which demonstrate the interest to study at the UdL". Santiveri also highlights the rise in cut-off marks in general, especially in engineering and the degree in Physical Activity and Sports Sciences (CAFE), both in Lleida and La Seu d'Urgell; and the double degrees in CAFE with Primary Education and Physiotherapy.

On the Igualada-UdL campus, the highest cut-off mark corresponds to the double degree in Physiotherapy

In Catalan, 81.51% of students already have an assigned place and 62.13%, in first preference, according to the Department of Research and Universities. As for the highest cut-off marks, the ceiling continues to mark the double degree in Physics/Mathematics taught at the Universitat Autònoma de Barcelona, with 13.438 places in the degrees that offer less than 40 places in the first year. While, in degrees with more than 40 places, the highest cut-off mark is that of Medicine in the Clinical Campus of the University of Barcelona, with a 12,946.
